Measuring Up Your Layout

1. Using the grid supplied to sketch an overhead view of your kitchen. Start at the 0,0 position (upper left corner) and draw outward.
2. Start in the corner of the room and measure the overall dimension of your walls. Write the measurement, in inches, on the shaded area of the grid.
3. Mark the location of all windows and doors noting their width and height including trim. Remember to always measure from the outside edge of the door and window trim.
4. Draw in major appliances noting their outside width, height and depth.
5. Mark the position of plumbing, gas and electrical outlets.

This form must be complete before a design will be started.
